Johannesburg South Africa 2001

To Whom It May Concern,

I am writing to express my interest in the Data Analyst / Data Scientist position. With a strong academic foundation in Information Technology, majoring in Emerging Technologies, and hands-on experience in tools like Python, SQL, and Excel, I am confident in my ability to contribute meaningfully to data-driven projects and organizational decision-making.

Throughout my studies at Richfield Graduate Institute of Technology, I have developed a passion for uncovering insights from data. I have worked on several projects involving data cleaning, visualization, and statistical analysis, where I applied machine learning concepts and tools such as Pandas, NumPy, and Matplotlib. My understanding of databases and data processing pipelines also positions me well to work in real-world analytics environments.

In addition to my technical skills, I bring strong attention to detail, problem-solving abilities, and a proactive approach to learning and collaboration. I am eager to apply these strengths in a professional setting and grow further in the field of data science.

Thank you for considering my application. I would welcome the opportunity to contribute to your team and discuss how my skills align with your organization's goals.

Yours sincerely,

Glenda Makamadze
